

AMENDMENTS TO THE CLAIMS:

1.-216. (Cancelled)

217. (New) A spinal implant, comprising:

an elongate bone portion having a longitudinal axis and including:

a first end portion;

a second end portion arranged generally opposite said first end portion;

a first bone engaging surface;

a second bone engaging surface arranged generally opposite said first bone engaging surface;

a first sidewall extending between said first and second bone engaging surfaces and including a concave surface extending along said longitudinal axis between said first and second end portions; and

a second sidewall arranged generally opposite said first sidewall and including a convex surface extending along said longitudinal axis between said first and second end portions.

218. (New) A system including a pair of spinal implants formed of bone, each comprising:

a first end portion;

a second end portion arranged generally opposite said first end portion;

a first bone engaging surface;

a second bone engaging surface arranged generally opposite said first bone engaging surface;

a first sidewall extending between said first and second bone engaging surfaces and including a concave surface extending along said longitudinal axis between said first and second end portions; and

a second sidewall arranged generally opposite said first sidewall and including a convex surface extending along said longitudinal axis between said first and second end portions.
